本说明书用于早先生枕头产品

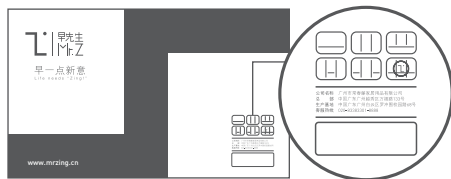

早先生产品概念

传统概念的枕头，在高度、软硬度、材质等不可更换的限制下，基本不可能满足个体之间因身体构造、睡姿喜好、睡感要求等而产生的千万种睡眠需求。

为解决眠者对睡枕的个性要求，早先生推出全新自由组合式枕头。组合枕把一个枕头根据区域功能特点，拆分成各个可自由拼接一起的单体包。每一用户可根据自身实际需求，自由选择单体包的软硬度、高度，组合出真正适合自己的睡枕。

Mr.Z User Manual

This manual is for use with Mr. Z's pillow products.

Customised Pillow

Limited by static height, hardness and materials, it's impossible for traditional pillows to meet the different sleep demands of individuals, caused by different body shapes, and sleep habits.

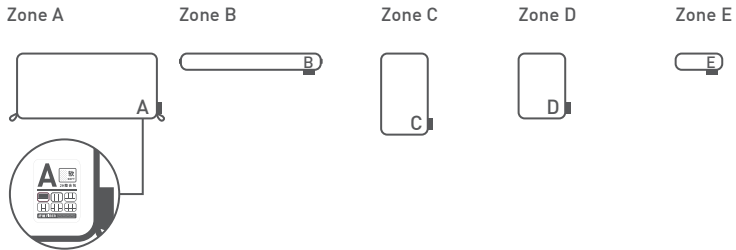

In order to satisfy the individualistic needs of sleepers, Mr. Z has rolled out a brand new free-form pillow system. The modular system divides a pillow based on the functions and characteristics of each area into zones that can be easily changed. Now everyone can create a pillow perfectly fitted to their unique demands.

00 Package Label

The combination of pillow that you have purchased may be discerned from the label located on the rear lower right of the external package.

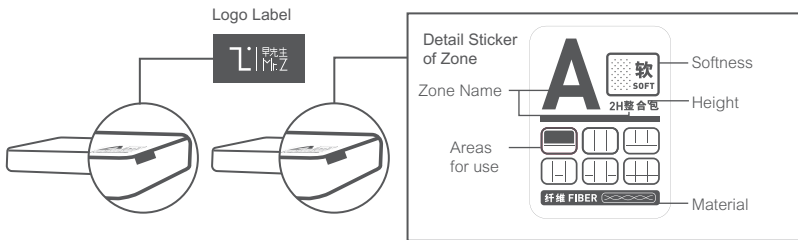

00 Identifying Tag and Mark

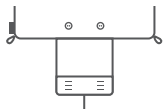

00 Zone Tag

Instructions for using the height pads

Every pillow set is supplied with three height pads. These may be placed underneath the pillow to raise the pillow's height and better meet your sleep needs.

1 Pillow height adjustment

After inserting a pillow set into a pillow case, place three height pads evenly underneath the pillow. Fasten the pillow buttons. Elevation is now complete.

2 Left and right height adjustment for side-sleeping

After inserting a pillow set into a pillow case, place two height pads evenly underneath the left and right sides of the pillow. Fasten with the pillow fasteners. Elevation is now complete.

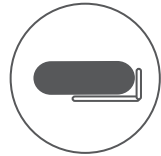

3 Middle height adjustment for back-sleeping

After inserting a pillow set into a pillow case, place one height pad evenly under the middle of the pillow. Fasten the pillow buttons. Elevation is now complete.

4 Height adjustment for head area

After putting a pillow set into a pillow case, place the height pads in the pillow at the bottom of the head area. Fold the rest of height pads along the edge of the pillow. Fasten the pillow buttons. Elevation is now complete.

> Reminders

When using a height pad, please make sure to place the pad evenly in order to avoid the pad(s) piling up at the edges and creating an uncomfortable sleep feel.

Use and care

Mr.Z Free-form Pillow

Mr. Z pillows should not be machine washed, dry cleaned, ironed or bleached.

Care for different materials:

Latex, Memory Foam, Composite Material

Place in a dim, cool, well-ventilated area. Avoid exposure to sunlight; otherwise, deformation of the product may occur. Dirt over a small area may be wiped away with a wet cloth. After doing so, place cushion in a dim, cool spot to dry.

Avoid Exposure

Polyester Fiber

We recommend placing the pillow in a mild, sunny spot to dry after using for a time. This helps kill bacteria and eliminate moisture. Drying time should not be excessively long, to avoid damage to fibres.

Dry in
the Warm Sun

Pillowcase

Mr. Z's original pillow cases are 100% cotton. They may be hand washed, best at a temperature of 30°C. We recommend regular washing to reduce the growth of bacteria and to maintain personal hygiene.
